

HANDS-ON CADAVERIC ENDOSCOPIC MITRAL COURSE

EXPERT COURSE by Dr. Frank Van Praet

Be ready to start your own endoscopic MV program soon

*Supervised directly by Dr. Frank Van Praet
chair of cardiac surgery and co-director at the
cardiovascular center OLV Aalst, Belgium*

In more than twenty years of teaching and guiding surgeons by case-observation and later proctoring I have been a personal witness of the huge gap between being a good surgeon, having the ambition to start such a mini-mitral program and actually being successful in doing it. All the tips and tricks leading to a good endoscopic exposure of the mitral valve are key in this training.

My ambition is to transfer all this knowledge and hands-on skills step by step to the individual participant to make him or her truly ready for a successful start in their own departments.
