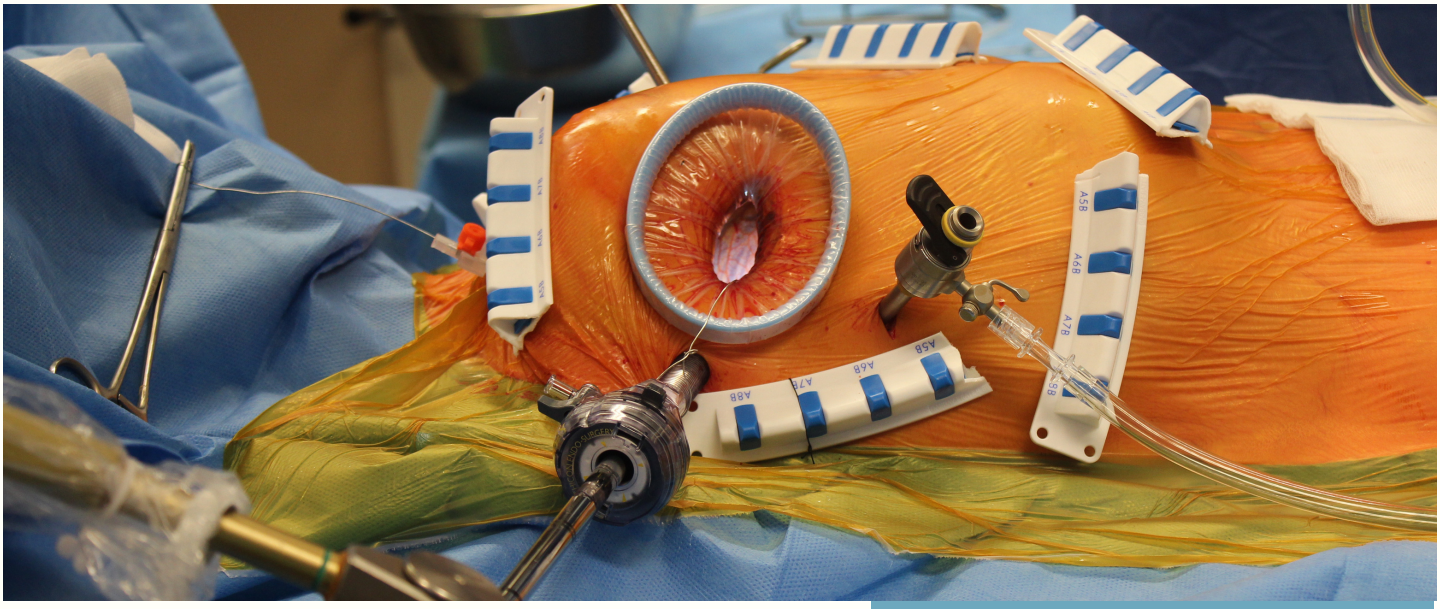
HANDS-ON CADAVERIC ENDOSCOPIC MITRAL COURSE

EXPERT COURSE by Dr. Frank Van Praet



Be ready to start your own endoscopic MV program soon

Supervised directly by Dr. Frank Van Praet
chair of cardiac surgery and co-director at the
cardiovascular center OLV Aalst, Belgium

In more than twenty years of teaching and guiding surgeons by case-observation and later proctoring I have been a personal witness of the huge gap between being a good surgeon, having the ambition to start such a mini-mitral program and actually being successful in doing it. All the tips and tricks leading to a good endoscopic exposure of the mitral valve are key in this training.

My ambition is to transfer all this knowledge and hands-on skills step by step to the individual participant to make him or her truly ready for a successful start in their own departments.
